

TALKING JAWS

Here's a fragment of a Jaws script by Dave Pinto:

```
Function SayTrackNumber ()
Let CurrentTrackNumber=GetCurrentTrackNumber ()
Let MaximumTracks=GetMaximumTracks ()
If UserPressedDownArrow then
  If TracksAudioTrack then
    Say ("Audio Track")
  Else Say ("MIDI Track")
  Endif
  Say (CurrentTrackNumber)
  If TracksSelectedForEditing () then
    Say ("Selected")
  Endif
  If CurrentTrack=MaximumTracks then
    Say ("LastTrack")
  Endif
Endif
EndFunction
```
